FY ' 01					ļ				1983
	Lab G 805 MHz installation	7							1300
		Install s.c. magnet, install He transfer					FNAL	331	1
		lines, complete roof of cave, complete							
		water supplies and interlocks, test							
		klystron with RF into dummy load	195	1.6	136	331			
	Lab G 201 MHz installation	٦							
	Eas & 201 Will Indianation	Prepare for 201 MHz, build shielded					FNAL	549	1
		cave, install gates, interlocks, water						0.0	
		supplies, prepare space for tetrode and							
		modulator	200	4.1	349	549			
	Be window R&D	7							
	Be WINDOW R&D	Design and testing of Be windows and					FNAL/LBNL	106/106	7
		gridded tubes	110	1.2	102	212	T INAL/LDINE	100/100	
		9	110		102				_
	201 MHz cavity design	7							
		Design of 201 MHz cavity with covered					FNAL/LBNL	111/455	
		apertures. Procurement of materials	345	2.6	221	566			
	805 MHz cavity	Tastian in Lab Compdifications to							7
		Testing in Lab G, modifications to pillbox cavity, re-testing.	205	1.2	120	325	FNAL/LBNL/ Mississippi		
		phibox cavity, re-testing.	205	1.2	120	323	MISSISSIPPI	30	_
FY '02									1370
11 02	Lab G 201 MHz installation	7							1070
		Buy tetrode, install tetrode and power					FNAL		
		supplies, drive amplifier and low-level							
		electronics, coaxial feed lines, complete							
		cave, install interlocks, install water							
		supplies	325	1.5	200	525			
	Be window R&D	٦							
	Be WIIIdow R&D	Design and testing of Be windows and					FNAL/LBNL		7
		gridded tubes	200	1	100	300	I IVAL/LDIVL		
		9	200	·		000			4
	LN temperature study	7							
		Investigate feasibility of LN cooling of					FNAL/LBNL		
		cavities	100	0.5	100	200			
	204 MHz	_							
	201 MHz cavity manufacture	Monufacture 204 MHz	П		1	1	1.550.7		7
		Manufacture 201 MHz cavity with covered apertures	245	0.5	100	345	LBNL/		
		oovered apertures	245	0.5	100	345	Mississippi		J

FY '03									955
	LN temperature study							<u> </u>	
		Test LN cooled cavity at 805 MHz in					FNAL/LBNL		
		Lab G. Modify s.c. magnet for vacuum.							
		Prepare cavity for LN cooling.	350	1.2	150	500			
	004 MHz	\neg							
	201 MHz cavity testing	Test 201 MHz cavity in Lab G.				I	FNAL/LBNL		
		Modifications to cavity, re-testing.	300	1.5	155	455	FINAL/LDINL		
		meaning to savily, to testing.	000	1.0	100	400	I		
FY '04									785
	201 MHz second cavity design and manufacture								
		Design of second 201 MHz cavitywith					FNAL/LBNL/		
		enhanced features. Procurement of					Mississippi		
		materials, manufacture.	655	1.5	130	785			
FY '05		¬							135
	201 MHz second cavity testing								
		Test second 201 MHz cavity in Lab G.					FNAL/LBNL		
		Modifications to cavity, re-testing.	85	0.5	50	135
